

Date: 13th July, 2026.

To: Raji Mubarak

**Department of Civil Engineering
Faculty of Engineering,
LASU, Epe Campus.**

Dear Mubarak,

**RE: APPOINTMENT AS HEAD OF DIGITAL INFRASTRUCTURE & WEB SYSTEMS – NEX
(NETWORK OF ENGINEERING XCELLENCE)**

I am pleased to formally appoint you as the Head of Digital Infrastructure & Web Systems of NEX (Network of Engineering Xcellence), an interdisciplinary society dedicated to uniting students across all engineering faculties and the School of Agriculture to solve real-world problems through collaboration, innovation, and practical action.

This appointment is made in recognition of your technical expertise, creativity, and ability to develop scalable digital solutions. I am confident that your contributions will form the technological backbone of NEX and enable us to operate as a modern, data-driven innovation community.

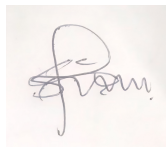

As the Head of Digital Infrastructure & Web Systems, you will be responsible for designing, developing, and maintaining the official NEX digital platform. This platform will serve as the central hub for member registration, executive information, project documentation, partnership requests, idea submissions, team formation, event management, and other digital services that support the operations and long-term growth of NEX. You will also oversee the continuous improvement of our digital systems and ensure they remain secure, reliable, and user-friendly.

This appointment is for one academic year, renewable based on performance, and you are expected to work collaboratively with the executive team, uphold the values of NEX, attend all executive meetings, and provide regular updates on the development and maintenance of the society's digital infrastructure.

Please note that this role is voluntary, but it presents a unique opportunity to build an impactful digital ecosystem that will support generations of students and contribute significantly to the long-term sustainability of NEX.

I encourage you to use the holiday period to begin planning the architecture of the NEX platform, identify the technologies required, and develop a roadmap that will allow us to launch with a robust and scalable digital presence.

Yours faithfully,

Oyewole Samod Atanda (SAMLAT)

Founder
